Rehab provided by
Tender Touch

“Therapists were all very kind, considerate and very helpful”

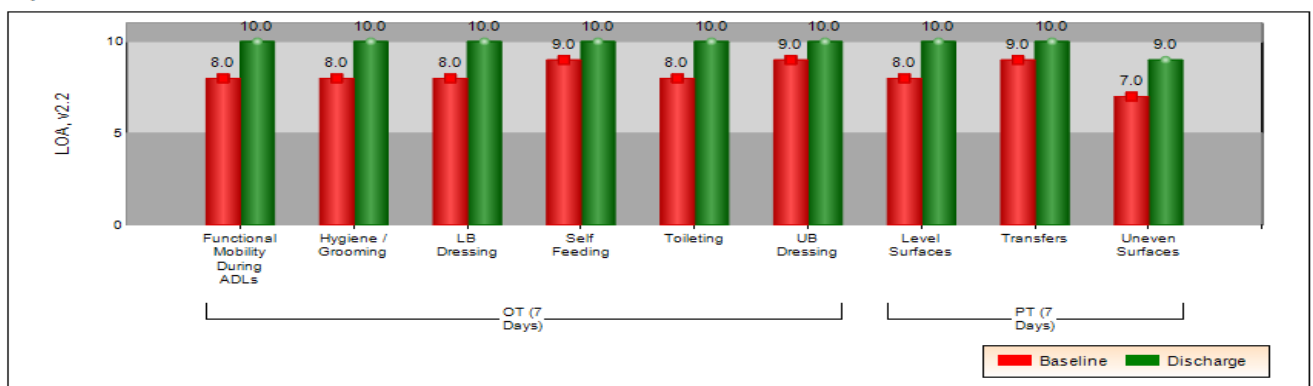

Celebration of success story

Lucretia was admitted to AristaCare at Hearthside following hospitalization secondary to diagnosis Fall with Multiple Fractures. During her stay, she was receiving Physical and Occupational Therapy services 5-7 days per week to address her functional deficits;

Upon initial evaluation Lucretia presented with generalized functional decline, strength and balance deficits, requiring increased dependency on caregivers with significant fall risk. In addition, she had a decline in self care, activities of daily living and mobility skills.

Lucretia stated on admission that her personal goal was to return home independently with family assist as needed. Lucretia was motivated and cooperative each treatment session during her short term rehab stay at AristaCare at Hearthside. Upon discharge home has achieved her goals of returning home independently and safely on 2/4/2019.

FUNCTIONAL OUTCOME MEASURES – REHAB

PROGRESS OVERVIEW

Physical Therapy – Lucretia required Min Assist with Ambulation and with transfers upon admission to a Supervision/Independent level at discharge to home with support.

Occupational Therapy – Moderate Assistance for dressing, toileting, Self care, progressed to Independence/Supervision with ADL mobility tasks and Self Care upon discharge;
